Run Code

```
In [1]: def longest_word(list):
        long = 0
        for words in list.split():
            if len(words) > long:
                long=len(words)
                longest_word = words
        return longest_word

Words=input("Enter a list of words:")
longest_word=longest_word(Words)
print("The longest word entered is:",longest_word)

Enter a list of words:he has made everything beautiful in its time
The longest word entered is: everything
```

In [ ]:
